

PROJECT OF THE MONTH

This project uses several different colored mirrored acrylic sheets from LaserBits to create **Birthday Celebration Boards**. The acrylic has been reversed engraved with all text except "Our" and "Celebrations." Those two were engraved on the front.

After engraving, all text was either white or black color-filled to bring added depth and dimension to the project. The discs can be hung with string and easily rearranged and added to.

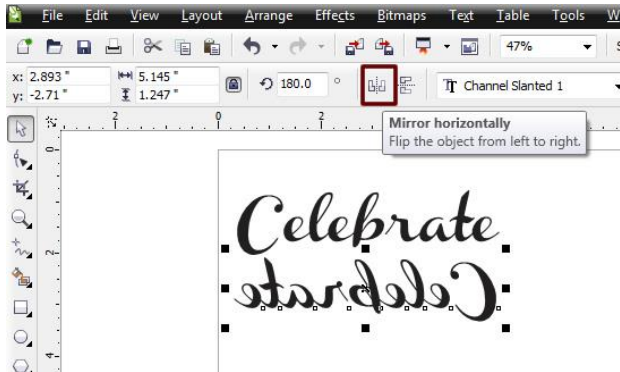

FEATURE: COURSE HIGHLIGHT

For more information about this project visit **The Project Center** and locate **Birthday Celebration Boards**.
