Things to keep in mind:

Laser Places - what is it? LaserBits has created a near mirror image of their existing website.

What is the difference?

This new site does NOT contain any pricing! Now you have a place to show *your* customers fabulous products and they will not know what you pay for the blank piece. It is located at <http://www.laserplaces.com> you can feel comfortable in letting your customers browse around looking for exactly what they want. It is not linked in anyway to LaserBits.

We have loaded all LaserBits items on the site.

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Odd-Shaped Items & Leather**. This comes from our Project Center titled - **Working with Odd-Shaped Items**.

Have you ever add something to engrave that wasn't nice and square to fit in your laser bed well....of course you have! How do you create it in DRAW and ensure proper placement in the laser bed matches your DRAW layout? Easy, read this lesson!

For more information on Odd-Shaped items and work with Leather, see the **Working with Odd-Shaped Items** in the **Project Center**.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
