

Greetings:

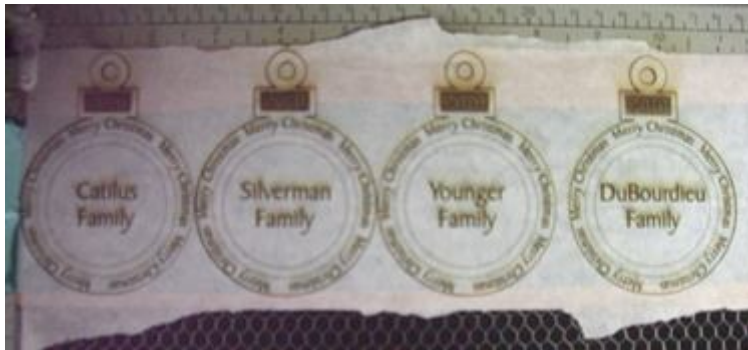

We hope to see you in Las Vegas later this month. LaserBits and LaserUniversity will have a booth at the ARA Show. I will be there on Wednesday, February 23rd through the afternoon of Thursday, February 24th. Be sure to stop by our booth!

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Text Substitution & Serialization**. This comes from our Learning Center titled - **Course 17**.

In Course 17 we cover both topics of Text Substitution and Serialization with three different programs: **CoreIDRAW, NameIt!NumberIt! and EngraveLab**.

Here are examples of finished products - one of each text substitution & serialization.

Text Substitution - text is replaced by new text**Example completed with NameIt!NumberIt! software**

Serialization - numbers increase by a designated amount

Example completed with EngraveLab software

For more information on this, see **Course 17** in the **Learning Center**.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.

Kathryn
