

What's New?

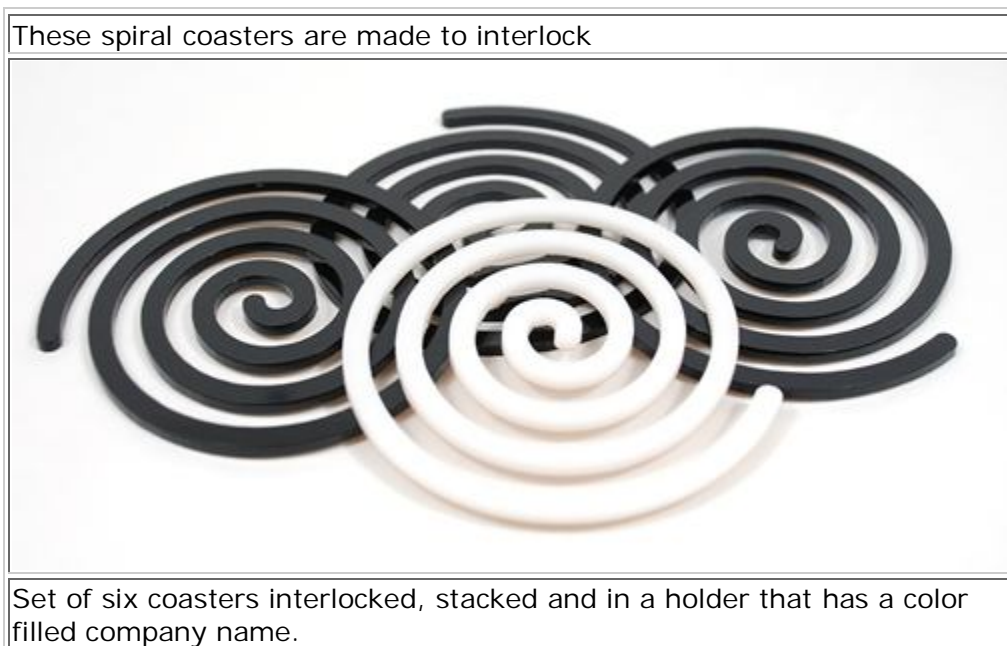

This month has seen the addition of several things to LaserUniversity. First, we finally have a discussion board *inside* LaserU instead of having to use an external one. Please visit and start posting and answering questions. You can find the link labeled **LaserU Forum** at the bottom of the left panel of links.

Next, I have added two exciting projects to the Project Center. They are Coasters and Greeting Cards. I have had a tough time deciding which to feature below as I thoroughly enjoyed creating each lesson the seeing the resultant product. While I decided on highlighting the coasters, I wish for you to check out the Greeting Cards as well.

I am looking at adding Course 16 about stamps in May. If you have any ideas for me on what to include as far as product ideas, please email me at laseru@laserbits.com

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Coasters**. For more information you can see the Project Center item titled **Coasters**. There are three levels of Coasters - Novice, Intermediate and Experienced. Here we will look at the Experienced example.

For more information on how the above was completed, visit LaserU's **Project Center** and see Coasters.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
