

May 03, 2010

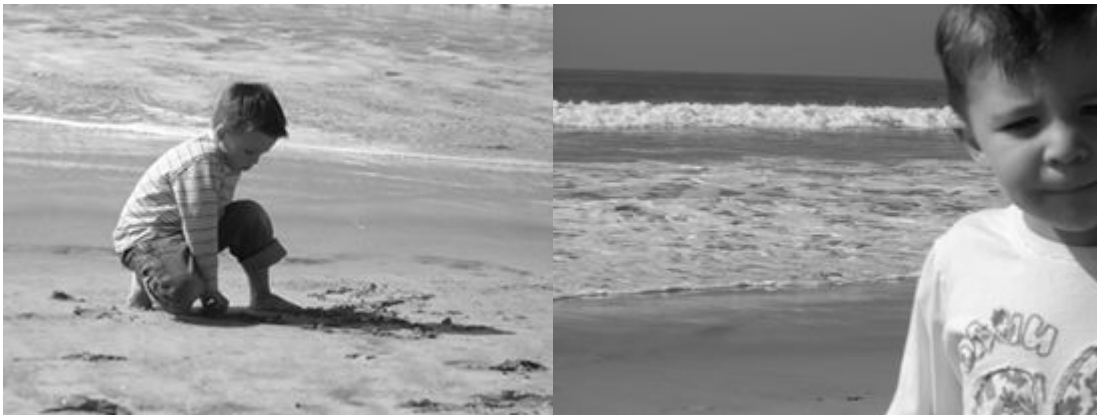

Greetings:

I enjoy working on all parts of LaserU but there is one section that I really dig into and love to add content to.....and that is the Project Center. It is so fun to think of creative ways to use the laser to create new and different products. If you have any neat products that you have seen or have created yourself....let me know! Please send me an email with any ideas you may have for Project Center additions. Pictures will be extremely helpful and even DRAW files, if you have them. And you will receive credit via this newsletter and your name (if you wish) being included in the lesson itself.

Laser Spotlight

Each month we will showcase an item, product or skill from LaserU. We will give a summary of the item and provide links for more information. This month we will look at **Magic Wand Mask Tool** from our Corel Center under the PHOTO-PAINT section.

This tool allows you to select objects from one image to merge with another to create interesting composites. Below are the two separate images and then my finished product!

For more information on how the above, visit LaserU's **Corel Center** and see the Magic Wand Tool item listed under the PHOTO-PAINT section.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
