...laser university's monthly newsletter

Greetings:

Summer break is soon coming to a close and school will be starting up again. I have a great gift idea for those teachers below. The example is for a team coach but it works for teachers too!

Additionally, please revisit Course 10. CerMark has now added a new method for applying the Tile & Glass marking solution. It is now available in a ready to use spray can. You can visit Course 10 Lesson 5 to learn more.

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Signature Photo Frames**. This comes from our Project Center titled - **Signature Frames**.

In this lesson, I show you how to take an adorable child's signature from this:

A handwritten signature in blue ink that reads 'COOPER'. The letters are stylized and somewhat irregular, characteristic of a child's handwriting. The 'C' is a simple curve, the 'O's are circles with a small dot in the center, and the 'P' and 'E' have long, sweeping tails.

To a memorable piece, like this:

Oh, and that cute, adorable Cooper signature (my son's!) is in the upper right corner of the engraved frame.

Here is a close up of the signatures.

For more information on this, see **Signature Frames** in the **Project Center**.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
