

### Things to keep in mind:

Hello! In working more and more with X5 and sending jobs to be engraved we have come across a glitch in the way X5 is set up. Its default settings are different than any prior version. X5 is currently set to CMYK and not RGB like it used to be. Our lasers are better able to process RGB and programs like PhotoGrav work in RGB. You may be thinking, "CMYK and RGB are codes for colors and lasers don't engrave in color." This is true, but even the values for black and white differ between CMYK and RGB.

There is an easy fix! [Just complete these 4 steps to better engraving results using X5.](#)

### Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Ornaments**. This comes from our Learning Center course 12 titled - **Ornaments; Glass, Wood & Acrylic.**

Learn how to make ornaments from glass, wood & acrylic. You will also learn how to use processes, such as, CerMark for Glass, laser foil, and color fills.

For more information on Ornaments see the **Course 12** in the **Learning Center**.

Please send questions and comments to [laseru@laserbits.com](mailto:laseru@laserbits.com)

See you next month with our next **The Laser Engraver** Newsletter.
