

Things to keep in mind:

The holidays are fast approaching. Be sure you have holiday exemplars of your work in your shop and in any place that will let you display them....your workout club, the community center of your neighborhood, the grocery store, your doctor's office....the list is endless.

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **the Contour Tool**. This comes from our Center Center titled - **Contour Tool**.

The Contour Tool is useful in many different applications. One is for making inlays. When an inlay is created the tool can account for the thickness of the laser beam to create a tight fit between the matching parts. It can also be used to create an outline of artwork you have created.

For more information on the Contour Tool, see the **Contour Tool** in the **Corel Center**.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
