## The App!

This month it is all about the app! We originally launched our app on GooglePlay for android devices in May. We heard a clamoring for the Apple version and we listened.

The primary focus of the app is the Settings Calculator. Select your laser, wattage and material and receive your speed and power settings. In addition, links to our YouTube channel Facebook page and Twitter account are all consolidated in the app so you don't have to search for us.

Use the links below to view the app information OR in the app store on your device, search for Laser Settings Calculator.
