

Greetings:

I hope everyone has had a safe and happy holiday season. We are starting out our new year at LaserUniversity with an update that I have wanted to complete for some time. It kept getting pushed back on my schedule but I am proud to say that Course 10 has been revamped and I love it! More information below.

Laser Spotlight

Each month we will showcase an item, product or skill from LaserU. We will give a summary of the item and provide links for more information. This month we will look at **Course 10** from our Learning Center on CerMark.

The course has been updated and remodeled! You won't even recognize it. Not only is the information about black CerMark metal marking still there but many other CerMark has been added: Metal Marking in both Pearl White and Bright Copper and Tile & Glass marking in black, bronze and blue!

Shown from top center clockwise: Pearl & Black CerMark Metal Marking on a tag, Black Glass & Tile Marking Solution on a glass frame, Bronze T&G on ceramic tiles, Pearl, Copper & Black Metal on outlet cover, Blue T&G on glass ornament, and Pearl Metal on tool steel.

For more information on how the above, visit LaserU's **Learning Center** and see the ICourse 10.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
