

February 01, 2010

Greetings:

We hope to see you in Las Vegas later this month. LaserBits and LaserUniversity will have a booth at the ARA Show. I will be there on the afternoon of Wednesday, February 24th through early evening of Thursday, February 25th. Be sure to stop by our booth!

Laser Spotlight

Each month we will showcase an item, product or skill from LaserU. We will give a summary of the item and provide links for more information. This month we will look at **Course 14 Lesson 3** from our Learning Center on getting cut line around irregular shaped objects.

In this lesson, we take a regular image (shown below) and not only cut out the Statue of Liberty from the background, but go on to create the necessary cutline to cut the statue out of a substrate.

For more information on how the above, visit LaserU's **Learning Center** and see the Course 14 Lesson 3.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.

Kathryn
