Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **engraving electronics**. This comes from our Project Center and is titled, **Electronics - engraving an iPhone & a Kindle**.

In this lesson we take you through the steps to learn how to protect the face of the electronic piece, run test print (because once it is engraved it is final!), how to process images for engraving, etc.
