

Things to keep in mind:

Don't forget we have some great videos loaded on YouTube on our LaserUniversity Channel located at: <http://www.youtube.com/laseruniversity>

Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look at **Glass & Crystal**. For more information you can see Course 20 - our brand new course inside LaserU!

Glass and crystal have become a whole lot more versatile with the advent of new product and new processes. See below for just a glimpse of coated glass, mirrored items, color filled, masked, and Cermark'ed items and photo engraving! Again, this is just a snapshot - check out our full course for all of the great details.

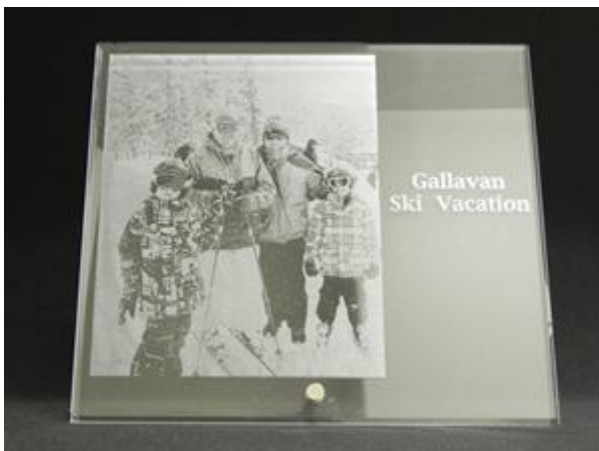

Photo Engraved on glass

Photo CerMark'ed on Glass

Glass color filled

Green masking tape used on crystal

CerMark used on words on glass

Photo engraved on Mirrored Glass

For more information on how the above were created, visit LaserU's **Learning Center** and see Course 20 - Glass & Crystal.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
