Laser Spotlight

Each month we showcase an item, product or skill from LaserU. We give a summary of the item and provide links for more information. This month we will look creating car magnets for runners. This comes from our Video Center in two videos titled **Using Laser Foil - Raster Method** and **Using Laser Foil - Vector Method**.

Laser Foil is a great way to add color to wood or acrylic projects. The first image showcases Laser Foil in the Raster Method. The second image displays Laser Foil in the Vector Method.

Laser Foil is a great product to add most projects!

For more information on this product see the **Video Center**.
