

LaserU Survey:

Thank you to everyone that has taken the time to fill out the survey for LaserUniversity. A link was sent out on December 2, 2009 for you to go to an online survey to answer questions to help us improve. If you would still like to partake in this 5-minute endeavor, please send me an email!

Some of the great feedback we have received over the years has resulted in the Project Center, the AutoCAD tutorials, adding in videos, adding in PDFs for all lessons, updating our CerMark information (Course 10) and much more.

We are excited for the upcoming plans for LaserU in '10 and I hope you are too! Add your voice to the mix by completing the survey!

Laser Spotlight

Each month we will showcase an item, product or skill from LaserU. We will give a summary of the item and provide links for more information. This month we will look at **Photo Touch Ups** from our Corel Center on PHOTO-PAINT.

The lesson focuses on the features in PHOTO-PAINT of the Clone Tool and the Touch Up Brush. Look below at a close up of a portion of the image I was given. I have included the originally scanned photo and the touched up version.

The photo was 25 years old and had fading, scratching and even tears in it.

For more information on how the above image was touched up, visit LaserU's **Corel Center** and see the lesson titled Photo Touch Ups under the PHOTO-PAINT section.

Please send questions and comments to laseru@laserbits.com

See you next month with our next **The Laser Engraver** Newsletter.
